DIPLOMA SUPPLEMENT

Registration № _____

This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free from any value judgements, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.

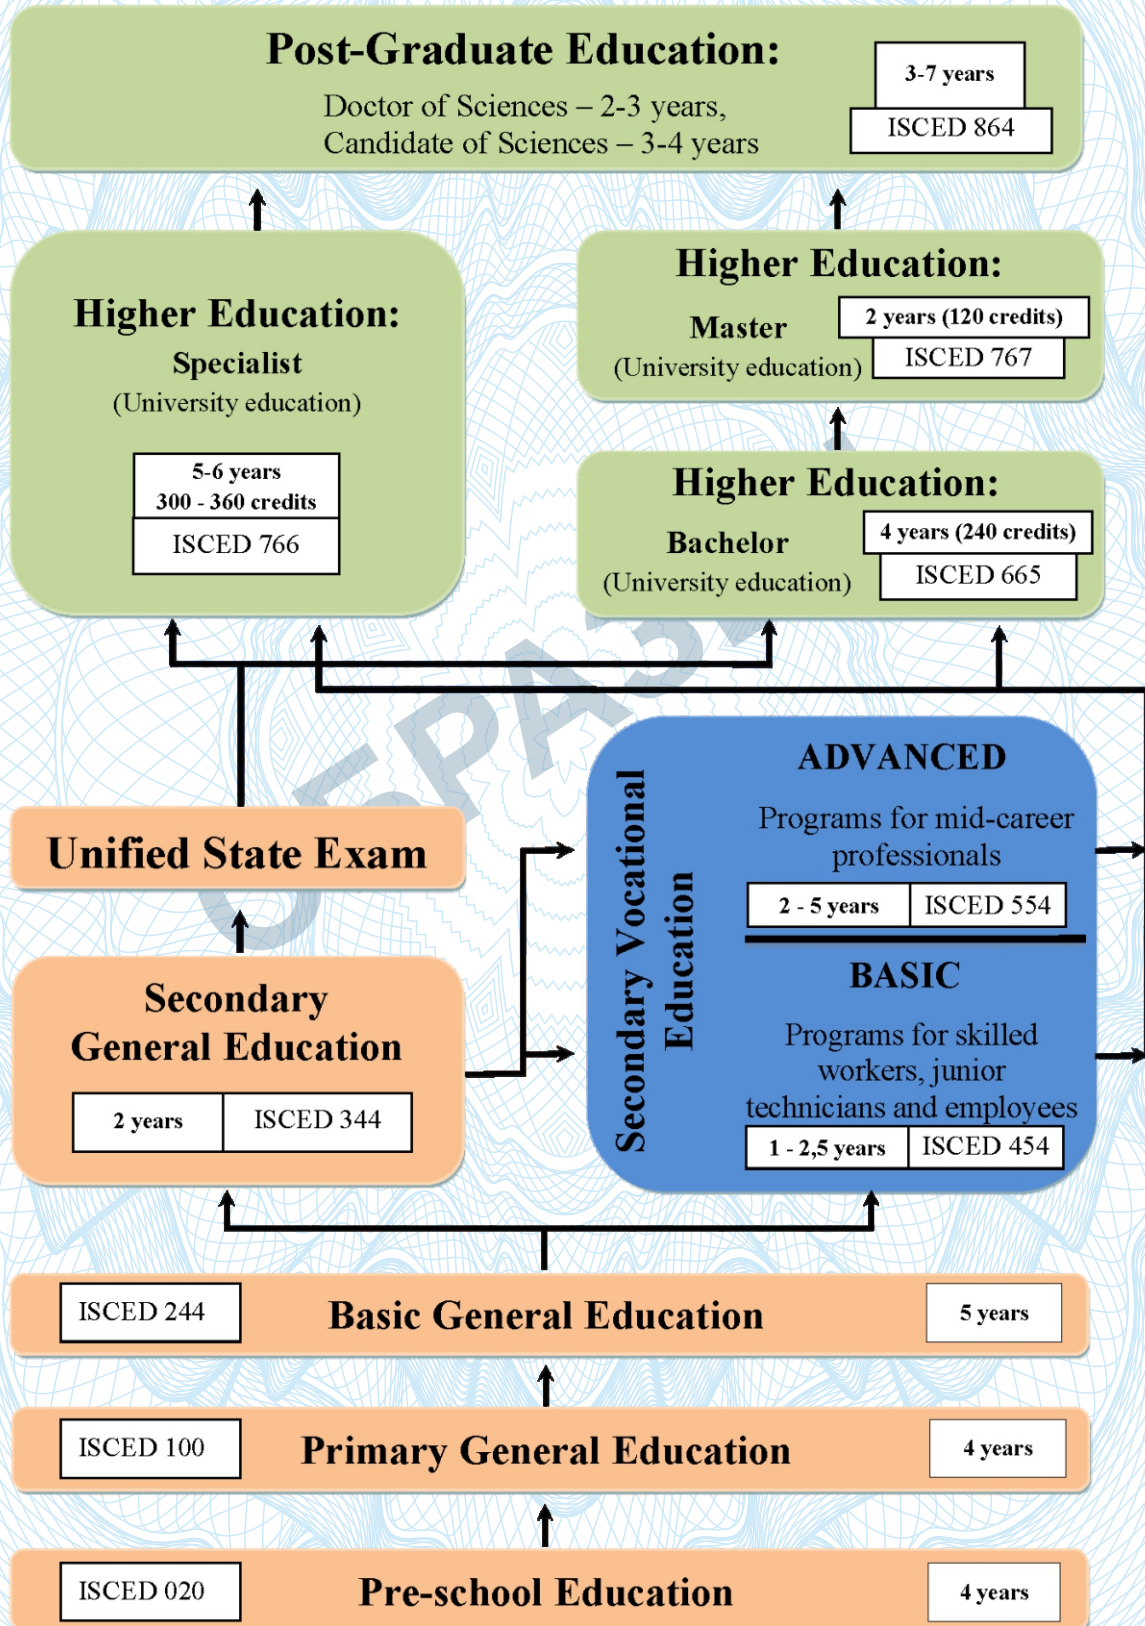

1. INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION				
1.1	Family name:			
1.2	Given names:			
1.3	Date (place, country) of birth:			
1.4	Student identification number or code:			
2. INFORMATION IDENTIFYING THE QUALIFICATION				
2.1	Name of qualification and name of title (full, abbreviated):			
2.2	Main field(s) of study for the qualification:			
2.3	Name of institution awarding qualification: status (type / control):			
2.4	Name of institution administering studies: status (type / control):			
2.5	Language(s) of instruction / examination: Russian			
3. INFORMATION ON THE LEVEL OF THE QUALIFICATION				
3.1	Level of qualification:			
3.2	Official length of programme:			
3.3	Access requirement(s):			
4. INFORMATION ON THE CONTENTS AND RESULTS GAINED				
4.1	Mode of study:			
4.2	Program requirements:			
4.3	Program details (e.g. modules or units studied and individual grades/marks/credits obtained):			
No	Course	Total Number of AH	Final Grade	ECTS Credits
1.				
2.				
3.				
4.				
5.				
In the framework of the curriculum, the student completed the following course papers:				
6.				
7.				
Practice				
8.				
9.				
10.				
11.				
Final State examinations				
12.				
Development and defense of final qualification work on the theme				
13.				
Total: ... AH ... credits				

Note: a) In Russian Federation (RF) the study workload is evaluated in «академические часы» (academicheskije chasy – academic hours or AH). 1 AH = 45 minutes. It is possible to evaluate workload in RF Units. 1 RF Unit = 36 academic hours or 27 astronomical hours. b) 1 week of fulltime study = 54 AH = 1.5 RFU.

4.4	Grading scheme, grade distribution guidance	The passing grades are «отлично» (otlichno/excellent), «хорошо» (khorosho/good), «удовлетворительно» (udovletvoritelno/satisfactory) or «зачтено» (zachteno/passed). Students are permitted to be enrolled to the next academic year and to be awarded a degree only in case they have the passing grade in all the disciplines included into the curriculum. Not passing grades are: «неудовлетворительно» (neudovletvoritelno/unsatisfactory) and «незачтено» (nezachteno/not passed) KemGIK grade distribution guidance– not available.
4.5	Overall classification:	
5. INFORMATION ON THE FUNCTION OF THE QUALIFICATION		
5.1	Access to further study:	
5.2	Professional status:	
6. ADDITIONAL INFORMATION		
6.1	Additional information:	
6.2	Additional information sources:	
7. CERTIFICATION OF THE SUPPLEMENT		
7.1	This Diploma Supplement refers to the following original documents:	
7.2	Date of signature:	
	Official stamp / seal	<p>Rector _____ /A.V. Shunkov/</p> <p>Dean _____ / _____ /</p>

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM(S)

Diagram of Russian education system

According to the Federal Law №273 «On Education in the Russian Federation», the education system consists of the following levels:

General education consists of four levels:

Pre-school education is provided by licensed institutions for children up to age 6 - 7 years, that is, before they enter formal school. Primary general education comprises grades 1-4, from the age of 7 to 10 years. Lower secondary education takes 5 years and comprises grades 5–9, from the age of 11 to 15 years. Upper secondary education takes two years (grades 10–11). Students complete secondary education at the age of 17-18 years.

All four levels of general education are provided on the basis of their own state standards. Secondary general education with 11 years of formal schooling is compulsory. On completion of upper secondary education (grade 11) a school leaving certificate is awarded. The name of this qualification is the Certificate of Secondary General Education (*Attestat o srednem obshchem obrazovanii*).

The general secondary school study program is culminated with mandatory state final attestation of each graduate in the Russian language and mathematics, which is an obligatory part of the USE. Graduates who have successfully passed the Unified State Examination - USE in Russian language and mathematics are issued Certificates of Secondary General Education.

Technical and vocational education (srednee professionalnoe obrazovanie) offers training programs of two stages:

- first stage programs: for skilled workers, junior technicians and employees;

- second stage programs: for mid-career professionals. Graduates of technical and vocational education programs are awarded Diplomas.

Education institutions of the second stage vocational education are generally known as *Tekhnikums* and *Colleges*. College can be independent educational institution or constituent part of HEI. It offers professional education programs of basic and advanced types. As a rule these programs are well coordinated with university level programs in the same field of study.

Higher education

There is the multilevel system of training of specialists with higher education in Russia and the following levels of higher education are set:

Bachelor degree (240 credit units) is conferred after a four-year course of study. Bachelor programs cover wide range fields of study. The function of Bachelor degree is to provide a more academically rather than professionally oriented education. Bachelor degree is a prerequisite for admission to Magister studies. State final attestation includes the defense of a thesis prepared over a period of four months and State 48 final examinations. Following a successful attestation, a state Diploma is issued attesting conferral of Bachelor degree.

The qualification of **Specialist Diploma** (300-360 credit units) has two functions. It opens access to professional practice (e.g., to engineers, teachers, chemists, etc.), and it is also the traditional prerequisite for admission to doctoral studies likewise master's degree. The qualification of Specialist Diploma is conferred after studies lasting not less than five years. The diploma is awarded predominantly in technical fields of study (specialties). The State final attestation for a Specialist Diploma covers the defense of a project or a thesis and State final examinations.

Master program (120 credit units) is a two-year course focused more on research activities in comparison with Specialist program (up to 50% of student's workload). But above all, this is a profound analytical and practical training of professionals in a particular field of study and practice. State educational standard defines only general requirements for Master educational programs and not the requirements regarding the content of education. HEIs are free to make their own decisions regarding the contents of Master programs. The State final attestation for a Master degree covers the defense of a dissertation and State final examinations. Access to Master studies is open for holders of Bachelor degree. HEIs themselves set up admission procedures (examinations, interviews, etc.) for applicants. Those holders of HE degrees wishing to pursue Master program in different field of study must pass an additional tests which reflect the requirements for the chosen Master program.

Doctoral Programs. The hierarchy of advanced scientific degrees in Russia traditionally includes Doctor's degrees of two levels: Candidate of Sciences (*Kandidat Nauk*) and Doctor of Sciences (*Doktor Nauk*). The Candidate of Sciences degree normally requires three years of study after the award of Specialist or Master degrees. The Doctor of Sciences degree can be earned after a period of further study following the award of the Candidate of Sciences degree. In reality, to earn a Doctor of Sciences degree requires five to fifteen years beyond the award of the Candidate of Sciences degree.¹
